Trump's Tariff's and It's Trade War Fear

Good Things Takes Time!

Trump digs in on tariffs as global stock markets go into freefall

Taiwan's benchmark TAIEX and Hong Kong's Hang Seng plunged about 10 percent on Monday (7th Apr) , while Japan's Nikkei 225 dived nearly 9 percent, Singapore, the Straits Times Index tumbled more than 7 percent.

In Contrast, India is down by 3.7%. With limited export dependence and strong domestic demand, India remains on track to be the world's fastest-growing major economy.

Not a time to panic sell, Just wait and watch how things unfold.

If any surplus left always focus on deploying more investments gradually in this market.

India's long-term story remains intact. India is likely to gain share in global output in the coming decades driven by strong foundational factors including robust population growth, a functioning democracy, macro stability influenced policy, better infrastructure, a rising entrepreneurial class and improving social outcomes.

We think the market is underestimating the impact of tax cuts for the consumer sector as well as RBI's policy pivot (regulatory easing, rate cuts, liquidity boost, MFI relaxations etc.). Current Nifty valuations are close to the long-term average which gives us a lot of comfort and supports a positive long-term return outlook.

Have you missed covid crash? this might be your second chance. Market corrected and waited because of Pandemic Crisis. This may not be the bottom of this crisis. But Crises, corrections, or negative sentiment always gives us attractive market valuations and undervalued opportunities. Uncertain times bring good prices.

Weekly Market Pulse

Domestic equity markets fell after witnessing rise in the previous two weeks as key benchmark indices BSE Sensex and Nifty 50 fell 2.65% and 2.61%, respectively. The fall was broad-based as the mid-cap segment and the small-cap segment both closed the week in the red.

Domestic equity markets fell triggered by the U.S. President's imposition of tariffs on over 180 countries, which heightened concerns about a potential global trade war that could impede worldwide economic growth.

Indian equity markets showed some resilience as the U.S. administration's 26% duty on Indian exports positioned India as one of the least-tariffed Asian exporters.

On the BSE sectoral front, BSE IT plunged 8.44% as investors reacted to global uncertainty following the U.S. President's latest tariff announcement. Major IT stocks experienced a decline due to fears of a recession in the U.S., prompting significant selling

Yield on the 10-year benchmark paper (6.79% GS 2034) fell by 12 bps to close at 6.46% from the previous week's close of 6.58%.
